

Synaptics Introduces World's First Capacitive Multi-Touch Interface Solutions for Use with Integrated Displays in Mobile Devices

February 8, 2011

SANTA CLARA, Calif., Feb. 8, 2011 /PRNewswire/ -- Synaptics Incorporated (Nasdaq: SYNA), announced today the world's first line of capacitive multi-touch interface solutions for use with integrated displays, the ClearPad™ Series 3 and Series 4. With on-cell and in-cell integrated displays, Synaptics makes it possible to seamlessly enable capacitive multi-touch sensing in mobile devices. Both ClearPad Series 3 and Series 4 are on-cell and in-cell display ready.

The ClearPad Series 4's revolutionary approach combines Synaptics state-of-the-art ClearPad multi-touch technology with the display driver (DDI) into a single-chip solution that delivers the most advanced display noise management and best-in-class capacitive sensing performance. Synaptics' display integration solutions provide cost effective capacitive multi-touch interfaces for mobile devices and provide the thinnest form factor with the complete elimination of a discrete sensor.

"Display-integrated touch is a whole new paradigm for touch sensor design, enabling our customers to deliver a thinner, higher-performing, multi-touch experience to the end user. ClearPad Series 3 and our new Series 4 solution are the only products on the market that can offer this" said Kevin Barber, senior vice president and general manager of the Handheld Division at Synaptics. "Series 4 further expands the design options with touch-enabled DDI, enabling display manufacturers to develop their display product offerings with Synaptics touch interfaces."

"Integrating touch into display is the best way to lower cost, reduce components, reduce weight/thickness, and improve performance." said Dr. Jennifer Colegrove, vice president, Emerging Display Technologies at DisplaySearch. "The worldwide market value of touch screen modules will reach about \$14 billion in 2016, from \$4.3 billion in 2009."

Synaptics is actively working with leading display companies to serve major OEMs worldwide. ClearPad Series 3 and Series 4 for display integration solutions will be available in the first half of 2011. For more detailed information contact visit www.synaptics.com.

About Synaptics

Synaptics (NASDAQ: SYNA) is a leading developer of human interface solutions for the mobile computing, communications, and entertainment industries. The company creates interface solutions for a variety of devices including notebook PCs, PC peripherals, digital music players, and mobile phones. The TouchPad™, Synaptics' flagship product, is integrated into a majority of today's notebook computers. Consumer electronics and computing manufacturers use Synaptics' solutions to enrich the interaction between humans and intelligent devices through improved usability, functionality, and industrial design. The company is headquartered in Santa Clara, Calif. www.synaptics.com.

Forward-Looking Statements

This press release contains "forward-looking" statements about Synaptics, as that term is defined under the federal securities laws. Synaptics intends such forward-looking statements to be subject to the safe harbor created by those laws. Such forward-looking statements include, but are not limited to, the Company's statements regarding its ClearPad Series 3 and Series 4 to seamlessly enable capacitive multi-touch sensing in mobile devices with on-cell and in-cell integrated displays; its revolutionary approach to delivering a single chip that delivers the most advanced display noise management and best-in-class capacitive sensing performance; and its display integration solutions providing cost effective capacitive multi-touch interfaces for mobile devices in the thinnest form factor with the complete elimination of a discrete sensor. Synaptics cautions that these statements are qualified by important factors that could cause actual results to differ materially from those reflected by the forward-looking statements contained herein. Such factors include, but are not limited to, (a) demand for Synaptics' products, (b) market demand for OEMs' products using Synaptics' solutions, (c) changing market demand trends in the markets Synaptics serves, (d) the success of customers' products that utilize Synaptics' product solutions, (e) the development and launch cycles of customers' products, (f) market pressures on selling prices, (g) changes in product mix, (h) the market acceptance of Synaptics' product solutions compared with competitors solutions, (i) general economic conditions, including consumer confidence and demand, and (j) other risks as identified from time to time in Synaptics' reports filed with the Securities and Exchange Commission, including Quarterly Reports on Form 10-Q and the Annual Report on Form 10-K for the fiscal year ended June 30, 2010. All forward-looking statements are based on information available to Synaptics on the date hereof, and Synaptics assumes no obligation to update such statements
